

MORE LIGHT

Jenoptik is an international photonics group with representatives in over 80 countries. Optical technologies are the foundation of our business. We employ around 4,000 people worldwide.

Join our team and help to shape our future with lasting effect.

Application and Service Specialist (f/m/d)

Reference number: 1796

Location: Jena, TH

Responsibilities:

We are looking for reinforcement of our innovative opto-electronic wafer-level test solutions team.

You will support us as a technical interface to the customer and contribute with your gained experience to the associated long-term product roadmap and development.

Responsibilities:

- ✓ Technical analysis of customer inquiries and requirements
- ✓ Development of user knowledge for the application of the test solutions
- ✓ Commissioning of the test solutions on site
- ✓ Service visits and support for our customers, especially during the initial setup of the equipment
- ✓ On-site operator training for our products
- ✓ Support in creation of product specifications and the identification of new technologies, products and standards
- ✓ Preparation of product-related technical information and guidelines

Qualified candidates will possess:

- ✓ Degree in physics, electrical engineering, mechanical engineering/ precision engineering or similar qualification
- ✓ Several years of professional experience in wafer level testing, ideally in a field service position
- ✓ Profound knowledge of test procedures, quality assurances and related processes
- ✓ Ideally knowledge in testing of opto-electronic devices, especially with respect to photonic integrated circuits
- ✓ Very good communication skills and distinct customer-oriented attitude
- ✓ A keen perception and deep technical comprehension
- ✓ Advanced English and German skills in both, speech and writing
- ✓ Willingness to travel worldwide up to 40% of your time

About Jenoptik

At Jenoptik, people with the specific JENIUS character are changing the world with the power of light. That demands a spirit of exploration and dedication. If you're one of us, come meet the challenges facing the world. At Jenoptik, we're creating a better future for all of us.

The Light & Optics division is a globally active OEM supplier of solutions and products based on photonic technologies. Jenoptik provides a broad portfolio, combining outstanding knowledge from more than 25 years of experience in the fields of optics, laser technology, digital imaging, optoelectronics and sensors.

In the Semi & Advanced Manufacturing strategic business unit, we serve our customers with high-performance optical systems differentiated by uncompromising precision. In close collaboration with our customers we develop application tailored beam-shaping optics, outstanding microoptics and opto-mechanical assemblies. Off-the-shelf F-theta lenses complement our offering.

Help us explore and maximise the potential of the digital world and medical technology.

Have we made you interested in this position?

If so, we look forward to receiving your online application.
